**DETAILED ACTION**

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Shields (U.S. 3,930,084).

See Figures 1-2 and col. 1, lines 40-65.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 9-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shields (U.S. 3,930,084).

Art Unit: 1772

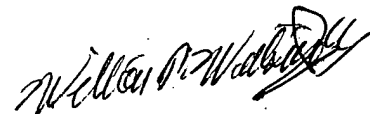

Shields teaches a decorative insert that is inserted into the recess in a rubber floor mat (Figures 1-2 and col. 1, lines 40-65). The reference discloses that an expensive adhesive maybe used if a permanent installation of the insert is desired (col. 1, lines 60-65). The instant invention claims an insert joined to a mat with adhesive. It would have been obvious to one of ordinary skill in the art to use an adhesive in order to make a permanent installation of the insert of Shields because of the teachings of Shields. Molding is a common way of forming rubber mats and inserts. As the insert and mat are assembled after formation in Shields, it would have been obvious to one of ordinary skill in the art to mold the insert and mat in separate molds. Reinforcement of rubber objects with cords and scrims such as in the tire art, was well known at the time of the instant claimed invention and renders obvious the instant claimed rubber mat reinforcement.
